

PoleCapper® Wood Utility and Telephone Pole Capping Compound

POLECAPPER® is an easy to use and clean to apply compound for the repair and protection of wood utility and telephone pole tops. The product is designed to penetrate the top layer of the wood thereby eliminating the possibility of moisture being trapped under the protective layer which can be encountered with some types of capping systems. It is also designed for a slight overflow around the circumference of the pole to provide complete protection without having to apply any extra accessory materials such as tape etc.

Benefits:

- 1. Excellent UV resistance**
- 2. Extends pole life at minimal cost**
- 3. No concern about pole diameter**
- 4. Easy and clean to apply under the most difficult circumstances**
- 5. The compound does not support the growth of fungi**
- 6. Material will cure in the presence of moisture**
- 7. Partially emptied cartridges remain useable**
- 8. Nothing else to purchase. All the necessary accessories are included in the starter kits.**
- 9. Properly applied it will stop moisture and decay.**
- 10. Fill large cavities and reinforce the top of the pole.**
- 11. Penetrates into pole and will not separate or crack**
- 12. Designed to cover edge around the pole diameter**
- 13. Protects from damage caused by freeze and thaw conditions**
- 14. Protects from insects**
- 15. Protects pole top from Wood Pecker damage**

Lineman Benefits

1. No annoying mess getting clothes, gloves and tools dirty.
2. Motionless mix heads are easy to attach and discard after use, resulting in minimal cleanup after the repair is complete.
3. Effortless manual dispense gun can also be used with the Pecker Patch[®] material.
4. No nailing or stapling is needed
5. No kneading or mixing before use.
6. No weighing or measuring the mix
7. The dispense gun and cartridges are clean and easy to store.
8. Effortless dispensing (including the manual dispense gun).
9. Long lasting, quick repairs
10. Apply it and forget it!
